

Job Growth by Size Class In Nevada

September 9, 2013

Susanna Powers, Economist

Job Growth by Size Class 2013 Q1 Y-O-Y

- In the Quarterly Census of Employment and Wages program, the Research and Analysis Bureau collects and compiles employment and wage data using the unemployment insurance administrative files from the employers' quarterly contribution reports. In addition, the employers' quarterly report provides employment and worksite statistics by business size classification.
- The bar chart shows employment changes across all private employment size classes in the first three months of this year relative to a year ago.
- Results show the private sector is creating jobs, with the exception of the establishments with 500-999 workers, where job readings fell 3,200 relative to the first quarter of 2012. In a closer examination, jobs fell in the 500-999 size class because there were sizeable amount of firms moving out of this category to either a smaller or larger size classes.
- Small firms in the 20-49 employee size class increased employment the most on a year ago basis, adding 7,200 jobs.
- Those establishments with no more than four employees added close to 800 jobs over the year.
- Nevada's largest businesses, those with at least 1,000 jobs, had 3,100 more workers in the first quarter of this year relative to the same quarter in 2012.
